Bubble 7-9	Science Maths Statistics (98) Computer Studies OR Religious Studies (alternative weeks) Option B	Statistics (99) Option A	Option D	Statistics (97) Option E	English Option C

Home learning is an invaluable part of our curriculum. Where appropriate home learning will be set as the timetable above by the class teacher, otherwise students are expected to do some independent learning to support their progress, these could include:

- ✓ Review work completed in previous lessons
- ✓ Use knowledge organisers on the school's web pages to review work for a previous years / topics  
<http://www.magnacarta.surrey.sch.uk/knowledge-organisers/>
- ✓ Use online tools such as BBC BITESIZE / KERBOODLE / ACTIVE LEARN MY MATHS / EDUCAKE to revise, review or self-assess knowledge.
- ✓ Reading around the subject i.e. appropriate magazines, linked articles on web pages

Information about curriculum for each Faculty can be found on the school website: <http://www.magnacarta.surrey.sch.uk/faculties/>

Research has shown that spending more than two hours a night completing structured study tasks has been shown to improve attainment in a range of subjects.

Home learning tasks will be recorded on class TEAMS and a reminder will be sent via SIMS homework app. Further information about home learning at TMCS can be found here: [www.magnacarta.surrey.sch.uk/home-learning/](http://www.magnacarta.surrey.sch.uk/home-learning/)

*❖ Maths will continue to set weekly home learning via MyMaths, Pearson ActiveLearn or worksheet. All students will have a week to complete this task. The most usual channel for home learning is MyMaths and students should check the website weekly on their allocated day. If home learning for Maths is set via a different medium this will be notified to students in class and via Teams.*
